SERIAL COMMUNICATION USING ARDUINO WITH PROTEUS

OBJECTIVES

- To establish serial communication between Arduino UNO and a Virtual Terminal in Proteus.
- To write an Arduino program using Serial communication at 9600 baud rate.
- To display and verify the transmitted data on the Proteus Virtual Terminal.

PROGRAM

```
int number = 0;
```

```
void setup()
```

```
{
```

```
    Serial.begin(9600);
```

```
}
```

```
void loop()
```

```
{
```

```
    Serial.print("Number is ");
```

```
    Serial.println(number);
```

```
    delay(500);
```

```
}
```

OUTPUT
